**SOARING EAGLE**  
**CAMPERS**

**DIFFERENCE**

**Utilize Better Quality Materials**

**Utilize Higher Quality Construction Techniques**

**Keep it Simple by Building Minimalistic Campers**

**Commitment to Customer Excellence**

**Commitment to DOING IT RIGHT!**

**It's important to us that consumers are educated on how each of our campers are built.**

**Yes, the exterior of a Soaring Eagle Camper is clean and looks sharp. But that is NOT what is important!**

**A lot of campers look good on the outside.**

**What is most important is what lies "behind" all of the eye appeal.**

**How is the camper constructed? How is a camper built? THAT should always be the most important consideration for any buyer!**

**Take a close look at one of our competitors manufacturing facilities where they also build entry level truck campers..**

This is the **STRUCTURE** of their camper! Plywood and thin pine lumber throughout.

Which is **Glued & Stapled** Together.

# Our Structure

**SOARING EAGLE**  
CAMPERS

You will NOT find  
ANY raw lumber used in the  
structure of an ADLAR Camper!

**SOARING EAGLE CAMPERS SHOP**

**Tubular aluminum forms the basis for every structural component of a Soaring Eagle Camper and is WELDED together for maximum strength.**

**SOARING EAGLE  
CAMPERS**

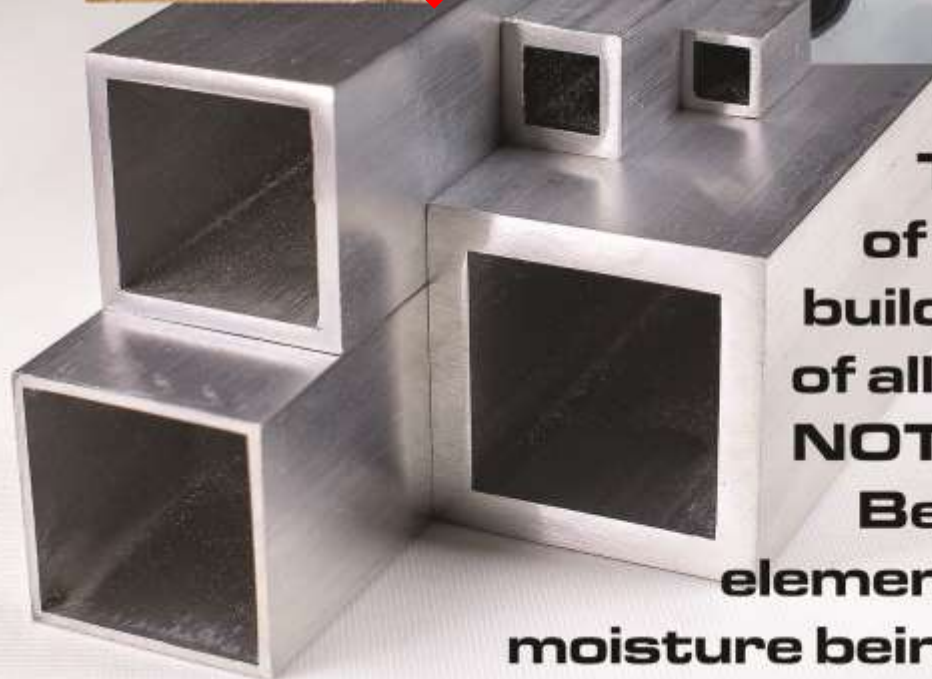

**THE STRUCTURE** is the most important part of the camper and Soaring Eagle Campers flat out offers the best built camper structure on the market!

**SOARING EAGLE**  
CAMPERS

**There are a lot of reasons they build airplanes out of all aluminum and NOT wood...**

**Being out in the elements with all the moisture being the biggest.**

**SOARING EAGLE**  
**CAMPERS**

**SOARING EAGLE  
CAMPERS**

**Our floors are made of tubular aluminum;  
our sidewalls are tubular aluminum; our endwalls are tubular  
aluminum; our roofs are tubular aluminum; even our pull-out bed  
structures are tubular aluminum!**

**NO WOOD NO ROT**

**STRENGTH AND LONGEVITY = ADDED VALUE**

**“A Soaring Eagle Camper will OUTLAST Your Truck!”**

**SOARING EAGLE  
CAMPERS**

**No other truck camper manufacturer can make this claim.**

**“A Soaring Eagle Camper will OUTLAST Your Truck!”**

**SOARING EAGLE  
CAMPERS**

Does a Soaring Eagle Camper cost a little more?  
Yes, and you will love the long-term savings that you receive by not having to fix or repair a lesser constructed camper over the years. How much is it worth to not have to watch your brand new camper rot away year after year?

Your Soaring Eagle Camper will probably outlast your next truck as well! 😊

**No other truck camper manufacturer can make this claim.**

**We've shown the structure of other entry level truck campers, but what do they use on the exterior of their campers?**

- **THIN TIN SIDING** or
- **THIN RIBBED FIBERGLASS**
- **No Strength, Difficult to Repair When Damaged**

**SE uses Thick, Rigid Fiberglass with a Composite Backer (no wood backing). It is Tough, Seamless, Adds Insulative Value, and is Easy to Repair**

**SOARING EAGLE**  
CAMPERS

**Tubular aluminum forms the basis for every structural component of a Soaring Eagle Camper and is WELDED together for strength. This includes the floor, walls, roof, and some interior components.**

**SOARING EAGLE  
CAMPERS**

**WIRING THE ROOF**

**Each individual piece of the structure is hand welded together, then stuffed with block foam insulation. The interior wall, ceiling boards, exterior sidewalls and roof are all backed with composite, not wood. Wiring is run through the structure, and it is ready to come together.**

**ROUTING OPENINGS**

**SOARING EAGLE  
CAMPERS**

Each of the individual components that make up the structure of the camper are screwed and bolted together, and THEN we weld them together at various spots on the coach giving it a **TRUE UNI-BODY CONSTRUCTION** that is unmatched in the industry, let alone for camper in the entry level market!

**STRUCTURE SCREWED & WELDED TOGETHER**

**SOARING EAGLE**  
CAMPERS

**SMOOTH FIBERGLASS EXTERIOR**

**QUALITY** is often talked about, but too rarely seen in entry level RVs. **IT TAKES TIME, EXEMPLARY EFFORT AND DEDICATION** to build campers that are made to stand the test of time and provide our customers with the best value proposition possible.

## **COMPOSITE BUILT DINETTE BASES in All ADLARS**

**Most RV Dinettes are built utilizing wood and paneling. Not Soaring Eagle Campers! Our custom crafted dinette bases are made of 100% composite materials. These lightweight, durable bases have built in storage, including battery boxes.**

# **TAILGATE CLOSED!**

## **Utilize Your Truck's Rear View Camera and Built-In Steps!**

**ADLAR customers love the fact that many of our units are designed to fit inside the bed of the Most Trucks WITH THE TAILGATE UP!**

**Not only does this provide extra security when traveling, it allows the owner to take advantage of the rear camera and sensors built into his tailgate.**

**This design also allows ADLAR customers to use the built-in STEPS that are integrated into most of today's modern tail gates!**

Soaring Eagle Campers' workers take pride in knowing that our campers are going to be used by people just like them and they are committed to making sure that our customer's camping experience is the best it can possibly be.

We have a saying around here, ***"Build it like you were building it for your family!"***

**SOARING EAGLE**  
**CAMPERS**

**Let's take a look at some of our different  
ADLAR Models..**

**The #1  
Choice for  
a True Half  
Ton Truck  
Camper!**

**Featuring a  
spacious interior,  
that can sleep 3-4,  
a portable toilet,  
microwave,  
wardrobe  
and more!**

**Weighing in at ONLY 1,200 lbs.!**

**The #1  
Choice for  
a True Half  
Ton Truck  
Camper!**

**Standard with a front  
over cab bed and a  
30" dinette that easily  
converts to a bed.  
Available with an  
optional pull-out  
North South bed.**

**You will appreciate the large wardrobe on the driver's side of the camper, as well as the portable toilet which is housed in an area with additional countertop space. On the passenger side of the camper, there is an overhead storage compartment and microwave oven.**

# Pull-Out Queen Bed

The cabover bed in the ADLAR 6.5XL quickly converts to a roomy queen bed with the optional North-South pull-out feature.

**Choose from WHITE or Platinum Gray exterior fiberglass.**

**For those who want more..**

**Customers had been asking us for an XL model that offered more amenities – especially a refrigerator, cooktop and sink.**

**We listened to their requests and designed the 6.5XLS model**

**Room for all your cooking needs, including a portable cooktop which can be removed and utilized outside on a table. The opt. sink with hand-fump faucet offers the ability to wash your hands or dishes.**

**The passenger side of the XLS camper features a roomy two person dinette with a swivel table for easy access, as well as a wardrobe and optional portable toilet.**

**For Small Trucks!**

**Not only does this model fit in a small 5' bed, but in most models, it also fits in the bed with the tailgate closed during travel for extra security and safety.**

**Customers and Dealers alike were asking for a truck camper designed for the small truck market (i.e. Tacomas, Rangers, Gladiators, Colorados, Frontiers, etc.)**

**Tacoma and Gladiator owners are fiercely loyal to their brand and before this camper they could only choose from various roof top tents they had to climb up into and be cramped. The Adlar 5.0 changed everything! Shown here with optional pull-out queen bed, 12V refer and micro.**

# NEW Adlar 8.0XL

**SOARING EAGLE**  
CAMPERS

# Adlar 8.0XL

Designed to fit in an 8' truck bed with the tailgate down, the Adlar 8.0XL model is basically the Adlar 6.5XL model stretched to fit a 8' truck bed. With the extra space, customers can choose between a 48" dinette/bed, or a 30" dinette/bed larger countertops.

**GENERATIONAL campers  
at an affordable price.**

**Soaring Eagle Campers –  
Offering affordable camping  
solutions for everyday people!**

# IT'S NOT CHEAP

**It's not cheap to build a camper using all welded tubular aluminum construction instead of wood.**

**It's not cheap to use one-piece, seamless fiberglass on the exterior walls and roof instead of thin metal coverings.**

**It's not cheap to use composites to construct our dinettes and other features instead of wood.**

**It's not cheap to build our floor structure out of tubular aluminum and insulate it instead of just using plywood.**

**We could make it cheap, but then it wouldn't be a Soaring Eagle Camper!**

A black pickup truck with a white camper shell is parked in a wooded area. The ground is covered with fallen leaves. In the background, a dog is sitting on a log. The scene is set in a forest with many trees.
