

GO ANYWHERE!

CAMP ANYWHERE!

**Soaring Eagle
Campers are
DESIGNED and
ENGINEERED to
offer owners the
longest lasting,
most durable truck
campers on the
road. We are
confident that when
you see how they
are built, you will
quickly understand
why they represent
the best value on
the road.**

FRESH AIR... ROLLING STREAM... WOOD FOR THE FIRE.. LET'S GO!

SOARING EAGLE
CAMPERS

CONSTRUCTION

We Utilize Better Quality Materials

We Utilize Higher Quality Construction Techniques

We Keep it Simple by Building Minimalistic Campers

We are Committed to Customer Excellence

We are Committed to DOING IT RIGHT!

What is most important is what lies “behind” all of the eye appeal. How is the camper constructed? How is the camper built? THAT should always be the most important consideration for any buyer.

It's important to us that consumers are educated on how each of our campers are built. Yes, the exterior of a Soaring Eagle Camper is clean and looks sharp. But that is NOT what is important! A lot of campers look good on the outside.

Let's take a closer look
inside some of our
competitors manufacturing
facilities where they also
build truck campers..

LOTS OF WOOD

Is this the
1970's when
this was
basically the
only way that
companies
knew to
build their
truck
campers?

NO!
That was 50
years ago.

This is 2025.

MORE WOOD..

**This is absolutely NOT
how anyone should
build a camper today.**

**THERE IS A
BETTER WAY...**

And here's a clue...

**it doesn't include ANY
wood in the Structure.**

HOW DOES

SOARING EAGLE
CAMPERS

BUILD OUR TRUCK CAMPERS?

ALL ALUMINUM!

Tubular Aluminum forms the basis for EVERY structural component of a Soaring Eagle Camper and is WELDED together for maximum strength.

SOARING EAGLE
CAMPERS

ALL ALUMINUM!

SOARING EAGLE
CAMPERS

You will NOT find
ANY raw wood or lumber used in
the structure of our campers!

SOARING EAGLE CAMPERS SHOP

THE STRUCTURE is the most important part of the camper and Soaring Eagle Campers flat out offers the best built camper structure on the market!

**SOARING EAGLE
CAMPERS**

**There is a reason
that they don't build
Airplanes out of WOOD...
but Strong, Lightweight,
Tubular ALUMINUM!
Aluminum's unique combination
of strength, lightweight and
the ability to repel the rain
and elements being the most important!**

**Here's a
NEWS FLASH..**

**Your camper is
going to be
exposed to
moisture – again
and again.**

The Structure of the Soaring Eagle Camper is screwed and bolted together as the camper starts to take shape.

Notice the dark colored composite board which is the backer behind both the interior wall and ceiling boards and the exterior fiberglass. This material adds R-value and is impervious to water and mold.

**SOARING EAGLE
CAMPERS**

**Doing it right takes time.
We build our campers one at a
time – not 20-30 a day.
We pay our team based on
quality, NOT quantity.**

While some of our competitors offer what they claim is “aluminum sidewalls”, they use only perimeter aluminum with hardly any wall studs in their laminated walls, claiming “the strength is in the foam”.

Sure it is...

No studs is done to save money and supposedly weight. The thing is, aluminum is very light, so why not have more studs? The only answer is to cut corners and costs.

**WHERE ARE ALL
THE STUDS????**

**SOARING EAGLE
CAMPERS**

NO CUTTING CORNERS HERE!

**Especially when it comes to the
Structural Integrity of our units!**

**If anything, we Over-Engineer our
Campers for Maximum Strength and
Stability as they bounce down the road!**

After the structure of the camper is screwed and bolted together, it is THEN SPOT WELDED at various points of the coach giving it a **TRUE UNI-BODY CONSTRUCTION!**

This attention to detail is unmatched in the entry level truck camper market!

SOARING EAGLE
CAMPERS

STRUCTURE SCREWED & WELDED TOGETHER

WIRING THE ROOF

Soaring Eagle Campers are also VERY WELL INSULATED with block foam insulation in most areas of the camper and bubble foil insulation in other areas.

Interior and exterior surfaces are backed with composite material, not wood.

ROUTING OPENINGS

Our campers earned the **GOLD STANDARD** rating from TRUMA after extensive testing in their Arctic Chamber – spending hours in SUB-FREEZING temperatures. While this test was designed to judge the efficiency of the TRUMA furnace, it proved how well insulated and sealed our campers are!

SOARING EAGLE
CAMPER

Stay Warm
Stay Cool

WHAT ELSE MAKES

SOARING EAGLE
CAMPERS

SOARING EAGLE
CAMPERS

DIFFERENT?

A lot of entry level campers utilize

- **THIN METAL SIDING or**
- **THIN RIBBED FIBERGLASS**
- **Both offer Less Strength and are Hard to Repair.**

**Soaring Eagle Campers
uses Only Thick, Rigid,
Seamless Fiberglass with
Composite Backing.
There is NO wood backing
that will rot or de-lam when
exposed to moisture.**

**This Durable, Seamless Glass Adds R-Value,
AND is Easy to Repair When Damaged.**

**SEAMLESS
ROOF and
SEAMLESS
WALLS**

**One-Piece
Seamless
Fiberglass with
composite
backing covers
the entire
exterior of each
Soaring Eagle
Camper.**

**SOARING EAGLE
CAMPERS
SMOOTH FIBERGLASS EXTERIOR**

How Important is it to use a Composite backing on Interior Panels and our Exterior Fiberglass?

Thin Iuan
wood backing
– which most
manufacturers
use – quickly
rots and
deteriorates
when exposed
to moisture.

NOT GOOD

**Soaring Eagle
Campers use of
composite backed
interior wall and
ceiling panels as
well as on our
seamless exterior
fiberglass panels
SETS US APART
from the
competition!**

A Soaring Eagle Camper will OUTLAST Your Truck!

Not many truck camper manufacturers can make this claim.

**Our floors are made of tubular aluminum;
our sidewalls are tubular aluminum; our endwalls are tubular
aluminum; our roofs are tubular aluminum; even our pull-out bed
structures are tubular aluminum!**

STRENGTH AND LONGEVITY = ADDED VALUE

WHAT ELSE MAKES

SOARING EAGLE
CAMPERS

SPECIAL?

Soaring Eagle INNOVATION!

**YOU CAN CLOSE
YOUR TAILGATE!**

**Utilize Your Truck's
Rear View Camera
and Built-In Steps!**

**SOARING EAGLE customers love the
fact that our units are designed to fit
inside the bed of most trucks
WITH THE TAILGATE CLOSED!**

**This provides extra security when
traveling, and allows the owner to utilize
their rear camera and other sensors built
into the tailgate, as well as use the
built-in STEPS integrated into most of
today's modern truck tail gates!**

COMPOSITE BUILT DINETTE BASES in All ADLARS

Most RV Dinettes are built utilizing wood and paneling. Not Soaring Eagle Campers! Our custom crafted dinette bases are made of 100% composite materials. These durable yet lightweight bases have built in storage and battery boxes.

**Soaring Eagle
EXCLUSIVE!**

ELIMINATE EXPENSIVE, COMPLICATED TIE DOWN SYSTEMS!

**SOARING EAGLE
CAMPERS**

There are dozens of complicated truck camper tie down systems on the market, but Soaring Eagle Campers has made it **VERY SIMPLE AND EASY** with our Retractable Ratchet Straps! Simply hook them on, tighten them, and drive away.

Soaring Eagle customers have the Option to Choose Between Arctic WHITE or Platinum GRAY exterior fiberglass colors.

COMMITMENT TO QUALITY

Soaring Eagle Campers is not your run of the mill RV manufacturer who cranks out RVs by the dozens each day. We are a small, family owned business that builds them one at a time and our workers understand the importance of quality.

SOARING EAGLE
CAMPERS

Soaring Eagle Campers' workers understand that people just like them are going to be using these campers and are committed to making sure that our customer's camping experiences are the best they can possibly be.

We have a saying around here,
***"Build it like you are building
it for your own Family!"***

**Soaring Eagle
Campers is all
about making
the Truck
Camping
Lifestyle more
enjoyable and
affordable for
families –
no matter
what size
truck you
have.**

**SOARING EAGLE
CAMPERS**

Does a Soaring Eagle Camper cost a little more than our lesser built competition? Yes, and we make no apologies about that. We are confident that you will love the long-term savings that you will enjoy by not having to fix or repair a lesser constructed camper over the years.

The decision you need to make is - how much is it worth to not have to watch your brand new camper rot away year after year?

Soaring Eagle Campers is the best value proposition for your hard earned investment.

IT'S NOT CHEAP

It's not cheap to build a camper using all welded tubular aluminum construction instead of wood.

It's not cheap to use one-piece, seamless fiberglass on the exterior walls and roof instead of thin metal coverings.

It's not cheap to use composites to construct our dinettes and other features instead of wood.

It's not cheap to build our floor structure out of tubular aluminum and insulate it instead of just using plywood.

**We could make it cheap, but then
it wouldn't be a Soaring Eagle Camper!**
